

## The ITS United Kingdom Interest Groups: **Enforcement Interest Group**

**Chairman** Trevor Ellis [trevor@trevorellis.co.uk](mailto:trevor@trevorellis.co.uk)

**Hon.Secretary** Colin Wilson, IBI Group [cwilson@ibigroup.com](mailto:cwilson@ibigroup.com)

### TERMS OF REFERENCE

#### **Objectives of the EIG**

- To identify the current enforcement requirements of the Police, Local Authorities and other statutory bodies that may be helped by ITS technologies.
- To promote awareness of ITS technologies available and needed to enforce, or to encourage compliance with, road traffic law or regulations.
- To identify and seek to address the potential legal and institutional barriers to implementation of ITS technologies.
- To work to ensure that any international standards in enforcement technology are appropriate and workable from a UK viewpoint.

#### **Strategies for achieving the objectives**

1. Provide regular meetings between the industry, Police, Local Authorities and other authorities.
2. Clarify requirements for changes in legal or institutional frameworks, where they unnecessarily prevent the adoption of technology for enforcement.
3. Promote the potential benefits of ITS to the Police and other authorities.
4. Provide input to national and international standards committees.
5. Appoint task forces, as appropriate, to carry out specific tasks.

#### **Typical activities of the Interest Group**

The Interest Group typically holds three meetings each year at location throughout the UK. Each meeting usually involves 2-3 presentations from respected professionals in the field together with opportunities for discussion and networking with other participants.

An annual Conference (usually in October) includes 6-8 presentations on enforcement-related subjects and attracts around 100 delegates.

## The Corporate Members of the ITS United Kingdom Enforcement Interest Group

ACPO ITS Working Group  
ACPO/HA Partnership Project  
AGD Systems Ltd
